Andrew Jenkins is the Chief Product Officer at Markerr, where he leads the product, engineering, and data science teams delivering analytics and intelligence for real estate investors and operators. He has more than 25 years of experience in commercial real estate, with a focus on technology, data, and investment strategy. Prior to Markerr, Andrew led Product and Engineering for the Investment Management division at RealPage, building tools used by institutional investors, fund managers, and syndicators. He joined RealPage through its acquisition of Investor Management Services (IMS), where he served as CTO and helped scale the platform into a leading solution for CRE investment management. Earlier in his career, he was the owner of Karnes, a regional CRE data firm acquired by Xceligent, and began in product marketing at XML software pioneer Extensibility, which was acquired by TIBCO for $100 million. His experience spans startups and scaled platforms, with deep expertise in asset management, investment workflows, and building data products that drive better decision-making in real estate.
